HackWithAgora

Themes

- Finance
- Health
- Education
- Entertainment

Judgment Criteria

- Feasibility
- Utility/Applicability
- Implementation (Functionality)

Problem Statements

Education

- How can we replace the human connection lost through social distancing?
- Create a progressive web app which can make virtual classes more interactive
- Build an AR/VR product which makes you feels you are working with people in person
- Virtual light weight Class attendance app/web

Finance

- Personal financial assistant
- Build an application to educate children about financial planning

Entertainment

- Build a creative application by combining AI with music and art
- Build the most humorous hack
- Engage with folks from the community by building a real time live streaming hack
- Build an engaging game with real time chat & voice feature

Health

- Smarter surveillance system in healthcare
- Virtual health assistant
- Improve medical and emergency communication
- Touchless experiences in hospitals with a system to meet people from wherever they are

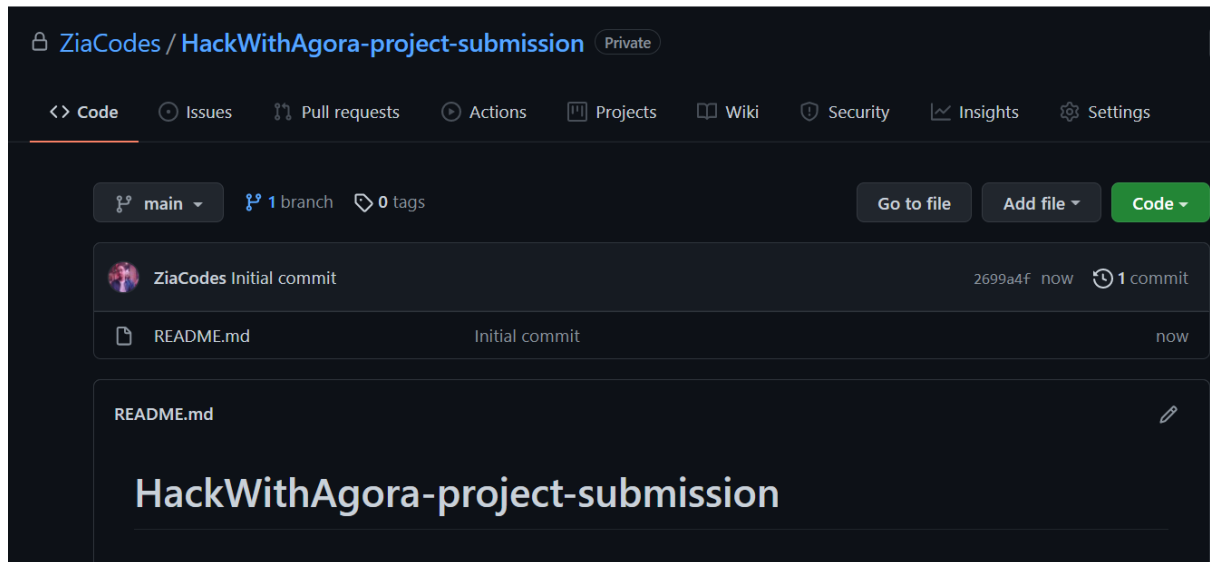

How To Submit Your Projects

Steps To Follow

1

During the hackathon, work on your project and update the code on a GitHub repository (preferred), and make it public, either through the GitHub Repository, a zip file on cloud storage, anywhere: as long as it is accessible by the judges.

Please remember to make your GitHub repository public before sharing it with us.

2

Make sure that the following are taken into consideration before submitting (**failure to do so will result in disqualification**) :

- Make sure you have your code link ready
- You should be ready with your PPT or Document of your project.
- Example – sample ppt

- Demo Link (optional) - Hosted / Live link of the prototype

3

Before submitting, make sure to go through the **Code of Conduct** and **Rules** for the hackathon.

Also note that no matter the number of submissions, one participant can only win one set of prizes.
